

Feature Catalog by Role

Every feature named for each of the eight user roles in the system — what each screen shows, what each control does, and how automated responses chain together after a check-in.

Source: SIH26094 PS · Google Doc · whiteboard images

1. Victim

Victims are pre-registered by District Admin. No self-signup. No OTP. No Google.

LOGIN

Feature	Notes
Docket ID + Full Name + State + District	Single login form — all 4 fields required; docket number is the primary identifier from NHAA/police complaint
Auto-detect State & District (GPS)	Button on login form — reverse-geocodes device GPS via Nominatim → auto-fills State & District dropdowns
State dropdown	Populated from jurisdictions table (level = state)
District dropdown	Filtered dynamically based on selected state
Change password	Available from Settings after first login

DASHBOARD

Feature	Notes
Case status	Shows current stage: Investigation / Trial / Rehabilitation / Compensation
Current distress level	Victim's latest score shown as Low / Moderate / High / Critical
Upcoming check-in date	Next scheduled interaction date
Alerts & important notifications	System-generated alerts visible to victim
Available supports	Quick links: helpline numbers (NHAA 14566, Tele-MANAS 14416), legal aid, support services

CHECK-IN & INTERACTION

Feature	Notes
Mental health check-in (questionnaire)	"How are you feeling?", "Do you feel safe?", "Are you experiencing stress or fear?"
AI Chat	Dedicated chat screen — victim can talk to AI anytime (not just during scheduled check-ins); multilingual
IVRS Call	Victim can initiate an automated voice-based check-in call from within the app

SMS check-in	Fallback for victims without regular app access
Multilingual interaction	Hindi, English, Bengali, Marathi, Telugu, Tamil

COUNSELLOR PREFERENCE

Feature	Notes
Opt-in for Manual Counsellor	Toggle in Settings — victim chooses whether they want a dedicated human counsellor assigned
In-app chat with assigned counsellor	WhatsApp-style text chat thread — only available after opt-in
Call Counsellor button	In-app direct call button to reach assigned counsellor — only available after opt-in

STRESS-LEVEL AUTOMATED RESPONSE

Triggered automatically after every check-in score is computed by the AI Risk Engine.

Distress Level	Automated Action
Low	Continue monitoring — no action
Moderate (above normal)	Push notification to victim suggesting exercises, breathing techniques, meditation
High	AI initiates a proactive voice/chat interaction with victim to check in
Critical — not opted for counsellor	System auto-assigns an available counsellor to the victim and notifies them
Critical — opted for counsellor	Assigned counsellor is pinged with an urgent alert: "Call this victim immediately"

WELLNESS & SELF-CARE

Feature	Notes
Exercise suggestions	Contextual suggestions based on distress level (e.g. walking, stretching, yoga)
Guided meditation & breathing	In-app guided session with timer and step-by-step instructions
Music suggestions	Calming / mood-lifting music recommendations
Journal writing	Victim writes freely in their preferred language → AI analyses text for stress signals → stored as multilingual notes

DISTRESS HISTORY

Feature	Notes
Distress score visibility	Victim sees their own current and past scores

Trend chart	Visual timeline of distress scores over time
--------------------	--

SETTINGS

Feature	Notes
Preferred language	Change the app language at any time
Profile	View registered case details
Manual counsellor opt-in toggle	Stored in victim profile; drives counsellor assignment and chat/call availability
Consent management	Per-channel consent, revocable at any time
Change password	Update password from Settings

2. Counsellor

Multiple victims can share the same counsellor.

LOGIN

Feature	Notes
Counsellor ID + Email + Password	All three required for login — credentials created by Super Admin
Change password on first access	Mandatory password reset on first login

DASHBOARD

Feature	Notes
Personalised login view	Shows only the cases assigned to this counsellor
List of assigned victims with back-stories	Full victim list with case history summaries
Segregated by stress level (AI-ranked)	List sorted/filtered by AI-computed distress level: Critical → High → Moderate → Low
Total case count	Aggregate count of all assigned cases
Scheduled counsellings	Upcoming counselling sessions calendar
Alert system — SOS trigger	Notification when a victim's SOS is triggered

CASE MANAGEMENT

Feature	Notes
Victim case detail view	Case info, current distress score, previous score, trend, risk level, intervention status
Personalised victim records	Detailed profile including case background, district, case stage

AI chart values shown to counsellor	Visual chart of response patterns and AI-scored values from recent check-ins
Explainable risk report	Shows exactly which signals drove the score (sentiment, voice stress, engagement, specific phrases)
Intervention recommended	AI suggests what type of intervention this victim needs (counselling, medical, legal aid, escort etc.)
Case notes — AI / Manual	AI auto-drafts a case note after each interaction; counsellor can edit or write manually
Decision making panel	Structured options: Need medical counselling / Need escort / Need legal aid / Need relocation etc.
Log intervention	Counsellor picks intervention type + writes notes → saved to record
Mark intervention complete	Closes the intervention loop and updates case status
In-app chat with victim	WhatsApp-style text thread — visible only if victim opted for manual counsellor
Ping to call victim (Critical alert)	Urgent notification: "Call this victim now" — triggered when victim hits Critical and has a counsellor assigned
AI follow-up tracking	System tracks whether a recommended intervention was acted upon

ALERTS

Feature	Notes
Real-time alert feed	Live-updating list of High/Critical alerts across assigned cases
SOS alert	Immediate notification when victim triggers SOS

3. District Administration

LOGIN

Feature	Notes
Counsellor/Admin ID + Email + Password	All three required — credentials created by Super Admin
Change password on first access	Mandatory password reset on first login

District Admin sees only victims registered under their district's jurisdiction.

DASHBOARD

Feature	Notes
Total cases in district	Aggregate count for the district
Vulnerable victims	Victims with sustained elevated scores

High-risk cases	Count of High-level distress cases
Critical cases	Count of Critical-level distress cases
Alerts feed	Real-time High/Critical alerts for the district
Distress trends	District-level trend lines over time

CASE ACCESS

Feature	Notes
Case detail view (read-only)	Score, trend, AI explanation — no intervention action
Counsellor workload view	How many cases each counsellor handles, average response time

REPORTING

Feature	Notes
Generate & share reports	Generate district-level distress reports and share them upwards with the Super Admin (Ministry)

4. State/UT Administration

LOGIN

Feature	Notes
Admin ID + Email + Password	All three required — credentials created by Super Admin
Change password on first access	Mandatory password reset on first login

State/UT Admin sees only victims across all districts within their state/UT.

DASHBOARD

Feature	Notes
State/UT-level monitoring	Aggregate view of all districts in the state/UT
District-wise breakdown	Side-by-side comparison of all districts — case counts, risk levels, trends
Rising-trend districts	Highlights which districts are seeing increasing distress
Drill-down to district → victim	Exception path for deep investigation

REPORTING

Feature	Notes
Generate & share reports	Generate state/UT-level distress reports and share them upwards with the Super Admin (Ministry)

5. National Administration

LOGIN

Feature	Notes
Admin ID + Email + Password	All three required — credentials created by Super Admin
Change password on first access	Mandatory password reset on first login

DASHBOARD

Feature	Notes
National-level monitoring	Aggregate view across all states
State-wise breakdown	Comparison of all states — case counts, distress trends
Drill-down: State → District → Victim	Deep investigation path
Policy-input trend lines	Longitudinal distress data for evidence-based policymaking

6. Super Admin (Ministry)

LOGIN

Feature	Notes
Admin ID + Email + Password	All three required
Change password on first access	Mandatory on first login

ROLE & ACCOUNT MANAGEMENT

Feature	Notes
Create Counsellor accounts	Issues Counsellor ID + email + sets initial password
Create District Admin accounts	Issues Admin ID + email + sets initial password (Limit: 1 per District)
Create State Admin accounts	Issues Admin ID + email + sets initial password (Limit: 1 per State/UT)
Create National Admin accounts	Issues Admin ID + email + sets initial password
Revoke / deactivate accounts	Disable any staff account
Role-Based Access Control (RBAC)	Access to data and actions strictly scoped by role and jurisdiction
PII Isolation enforcement	Only authorised officials can access the pipeline — raw PII never exposed to scoring/alert pipeline

DASHBOARDS & OVERSIGHT

Feature	Notes
Role-scoped aggregate dashboards	Monitoring at district, state, and national levels
Heatmaps by state / region	Region-wise victim count and stress level heat map
Connections with NHAA helpline IVRS	Integration touchpoints with the 14566 helpline infrastructure
Tele-MANAS integration	Escalation pathway to Tele-MANAS (14416) counsellor network
Inter-department coordination	Links welfare officers, law enforcement, and Tele-MANAS counselling networks
Receive Base-Level Reports	View and analyze reports generated and shared by base-level admins (District/State/UT)
Audit log viewer	Full log of every access and action on sensitive data

SYSTEM CONFIGURATION

Feature	Notes
Manage case types	Add/edit/remove case type options (e.g. Rape, Arson, Murder)
Manage intervention types	Add/edit/remove intervention options (e.g. Counselling, Medical, Legal Aid)
Manage channels	Configure active intake channels (chatbot, IVRS, SMS etc.)
Manage supported languages	Add/remove languages for multilingual support

7. Data Intake & Integration Admin

LOGIN

Feature	Notes
Admin ID + Email + Password	All three required — credentials created by Super Admin
Change password on first access	Mandatory on first login

VICTIM INTEGRATION & PROVISIONING

Feature	Notes
Create victim credentials	Registers new victims in the system (assigns Docket ID, Name, State, District)
Fetch case details	Integrates with NHAA (14566), Integrated Portal, or other approved channels to pull complainant details automatically

8. AI Risk Engine — Backend, No UI

Feature	Notes
AI response analysis	NLP, Sentiment Analysis, Emotion AI via Gemini 2.5-flash
Dynamic Distress Score Engine	Weighted formula: sentiment + emotion + engagement (voice stress in Phase 2)
Distress history & trend tracking	All scores stored with timestamp; trend computed over rolling window
Escalation prediction	Detects 3-point monotonic rise ≥ 10 pts across last 3 scores
Risk level classification	Low / Moderate / High / Critical thresholds
Automated case prioritisation	Case queue sorted by risk tier in real time
Voice stress analytics	Phase 2 — requires wav2vec2/SpeechBrain acoustic model
Alert creation & routing	Fires alert to assigned counsellor + district admin when threshold crossed
Dispatch worker	Background queue drains check-in reminders and alerts with retry logic
Stress-triggered wellness push	Moderate+ score $\rightarrow$ push notification with exercise/meditation suggestion
High-score AI call trigger	High score $\rightarrow$ AI initiates proactive call/chat with victim
Critical auto-assignment	Critical + no counsellor opted $\rightarrow$ auto-assigns available counsellor
Critical counsellor ping	Critical + counsellor assigned $\rightarrow$ urgent ping to counsellor to call victim

Feature list only — no build-status column.
